MUSEUM SYSTEM OF THE MUGELLO AND MONTAGNA FIORENTINA

The Museo Diffuso collects memories and objects which recall those traditional crafts involving the use of natural resources, the world of sharecropping, traces of ancient settlements, religious beliefs, the manufacture of art objects. It has also been thought of as a permanent workshop for the protection and appreciation of the landscape, to secure a system of ongoing maintenance of the territory and to highlight the specific characteristics of the area. The Museo Diffuso today is a system of collaboration between components differing in content but identified as Museums, Workshops and Itineraries: these are organized in Systems: natural, demo-ethno-anthropological, artistic heritage and architectural heritage.

The various components are set up as a "network" centrally connected to the Central Coordination Point at Villa Pecori Giraldi in Borgo San Lorenzo, where visitors are informed of the cultural opportunities of the Museo Diffuso and on how to enjoy them.
